1.4 PDF Template

PDF Template Feature: Enhance your PDF customization by selecting a template from our collection

Getting Help

If you have any difficulties while using this Plugin, please feel free to contact us at opensource@zealousweb.com. We also offer custom WordPress extension development and WordPress theme design services to fulfill your e-commerce objectives. Our professional impassioned WordPress experts provide profound and customer-oriented development of your project within short timeframes. Thank you for choosing a Plugin developed by **ZealousWeb!**

Here we have explained third Party integration help guide:

Google Authentication:

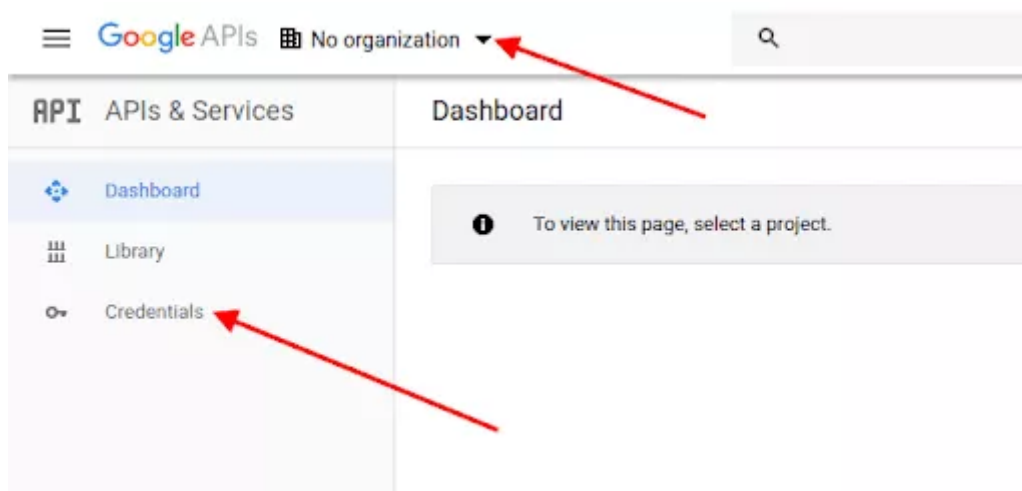

Incorporating Google sign-in into your site allows your site visitors to log in through Google in a single click saving their time. To integrate Google sign-in into your website, it is mandatory to create a Google Client ID and Client Secret.

Note: To generate Google Client ID and Client Secret you must be signed in to a Google account.

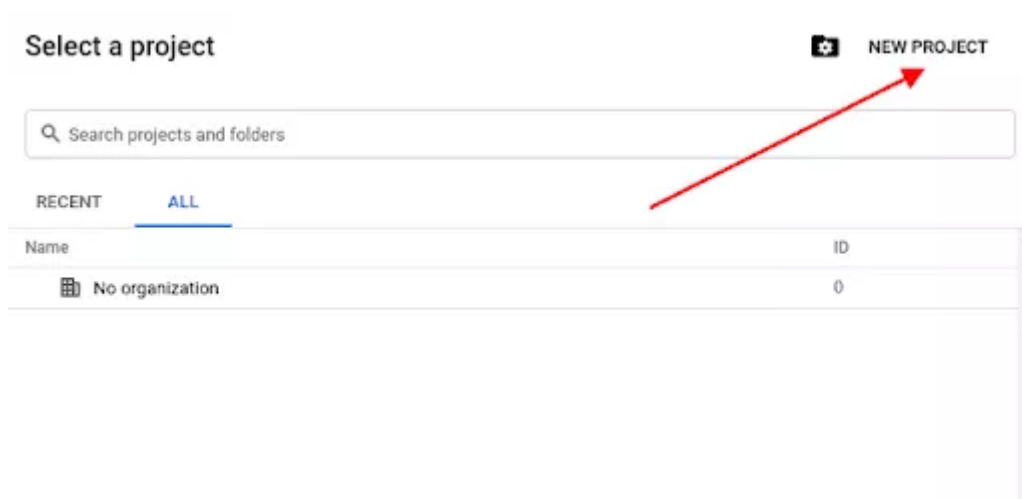

Follow the below simple steps to get Google Client ID and Client Secret

To get Google Client ID and Client Secret:

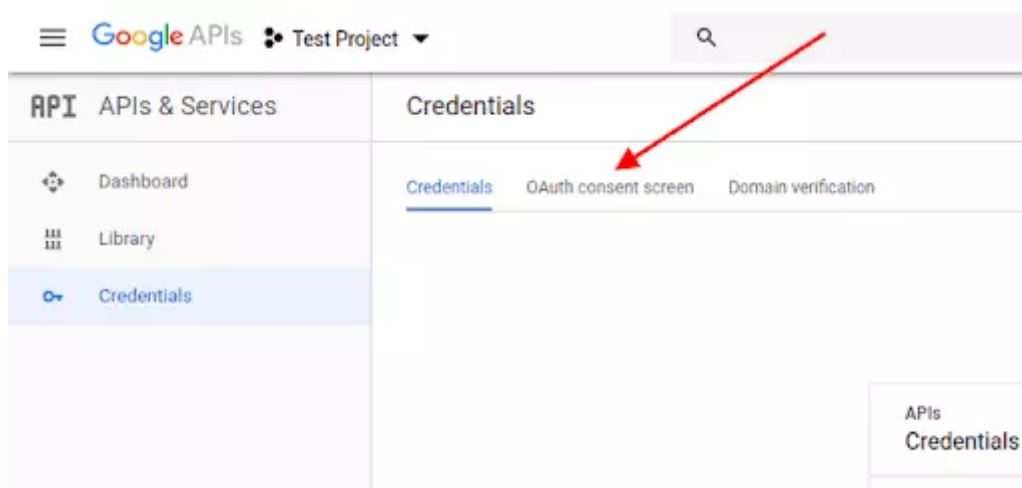

1. Go to the Google Developers Console.
2. Navigate to the “Credentials” tab.

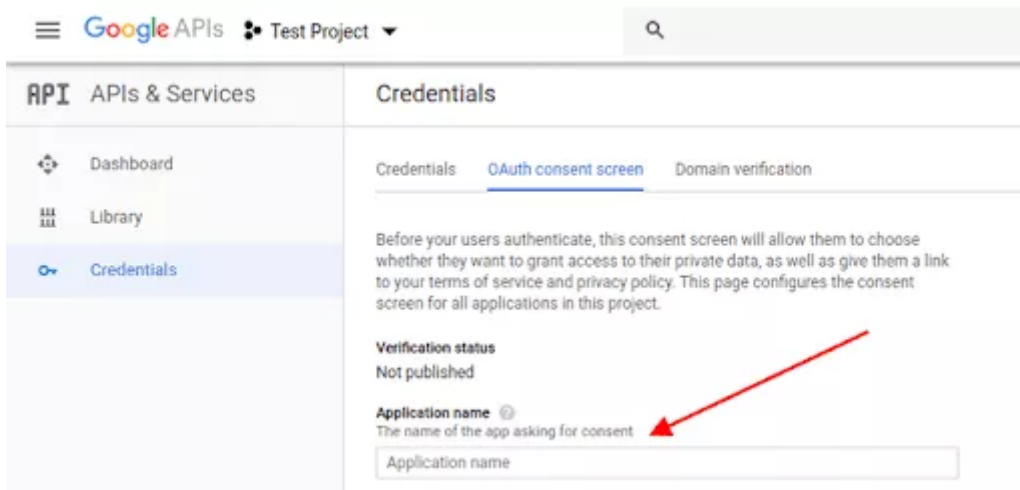

3. Click on Select a project >> New Project and then hit the “Create” button.

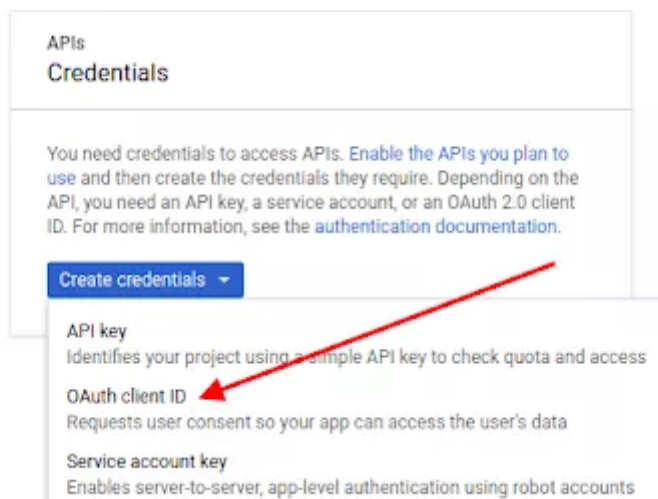

4. Navigate to the tab “OAuth consent screen”.

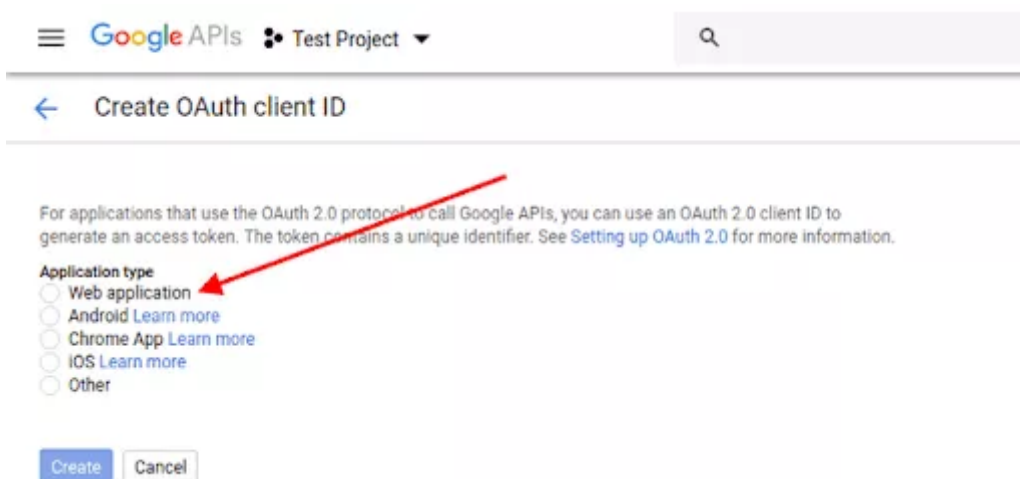

5. Enter the Application name, and Authorized domains, and click the “Save” button.

6. Click the “Create Credentials” button and from the dropdown list select OAuth client ID.

7. From the Application type, select the Web application, enter Authorized JavaScript origins and click the “Create” button.

8. Copy your Client ID.

Credentials OAuth consent screen Domain verification

Create credentials

Create credentials to access

OAuth 2.0 client IDs

- Name
- Web client 1

OAuth client

The client ID and secret can always be accessed from Credentials in APIs & Services

i OAuth is limited to 100 sensitive scope logins until the OAuth consent screen is published. This may require a verification process that can take several days.

Here is your client ID

183414586945- .apps.googleusercontent.com

Here is your client secret

jV07 9shd

Add that Client ID and Client Secret to the plugin's admin side and authenticate your account and connect with plugins easily.
