EXTENSION DESCRIPTION

Google Translate is a multilingual service provided by Google Inc. to translate written text from one language into another

Many clients require their website to be Multi-lingual, so that they can have large number of crowds on their Site. Magento handles this request by creating a multiple Store each of different language. On the Front side it provide the option to change the store. Creating Multiple store increase the work of Magento administrator, as they have to enter the content of each store for categories and Products. Developer work will increase as they have to maintain the language file for the Labels and heading. This will increase the Work load as well as load on the system.

To overcome this difficulties, we have come upon with “Language Traslator” extension that use Google translate API to convert the store in different Language. This way administrator do not have to manage content for multiple Store. Google Translate will manage the content on their own. The Best feature of this API is it allows us to modify the default translation.

INSTALLATION STEPS

Step1: Check Permission

Make sure the "app" have sufficient write permission to write the files.

Step2: Upload Files

Unzip and upload all content of the extension folder to the root folder of your Magento website using FTP client. On the request whether existing files (folders) should be replaced – select Yes.

Step3: Enable Extension using Component Manager (optional with Step4)

After uploading files, you can enable extension from System > Web Setup Wizard > Component Manager. You can find the extension listed in the grid and click on “Enable” option to start installation process wizard.

Component Manager

Step4: Enable Extension using SSH (optional with Step3)

If you have SSH access of you web server then you can setup extension using commands too. Please find commands below:

For windows server:

```
php bin/magento setup:upgrade
```

```
php bin/magento setup:static-content:deploy
```

For linux server:

```
bin/magento setup:upgrade
```

```
bin/magento setup:static-content:deploy
```

Step5: Refresh Cache

You can refresh cache from **System > Cache Management** from admin section. If you have SSH access of web server then you can refresh Magento cache by following command:

For windows server:

```
php bin/magento cache:clean
```

For linux server:

```
bin/magento cache:clean
```

Note:* **After all above steps please logout and login again in admin section.**

In case you face any problems while installing, feel free to Contact Us at magento@zealousweb.com

HOW TO USE

After the installation steps has been performed, you can see google translator at the header panel on the your website. We have kept enable by default.

You can find the configuration options in **System > Configuration > ZEALOUSWEB EXTENSIONS > Google Translator** in Admin Section. There is an option to enable/disable google translator from website. You can select the default language of the page and list of languages which will enable for translation.

The screenshot shows the 'Configuration' page in the Magento 2 admin interface. The left sidebar contains a navigation menu with categories like Dashboard, Sales, Catalog, Customers, Marketing, Reporting, and System. The main content area is titled 'Configuration' and shows the 'ZEALOUSWEB EXTENSIONS' section expanded to 'Google Translator'. The 'General' tab is active, displaying the following settings:

- Enable:** A dropdown menu set to 'Yes'. Below it, a note states: 'This will enable GOOGLE TRANSLATOR to header panel.'
- Languages Included:** A multi-select list containing Afrikaans, Albanian, Arabic, Armenian, Azerbaijani, Basque, Belarusian, Bengali, Bosnian, and Bulgarian. Below the list, a note states: 'Select the list of languages which are enable for the translation at frontend.'

The screenshot shows the 'Configuration' page in the Magento 2 admin interface, specifically the 'Design' tab for the 'Google Translator' extension. The settings are as follows:

- Position:** A dropdown menu set to 'Left'. Below it, a note states: 'This will add float style of the control to set the position. Select GOOGLE TRANSLATOR position in header panel based on you theme settings.'
- Custom Style:** A text area for entering custom CSS. Below it, a note states: 'Apart from position, you can add custom style to GOOGLE TRANSLATOR control based on your theme. FOR EXAMPLE border: none.'

After saving all the configuration options from admin section, you can see the google translator at header panel of website. There are all the languages listed for translation which are configured in admin section.

Home Page

CMS homepage content goes here.

You can add GOOGLE TRANSLATOR block in any CMS Page / Block or Layout Page / Block.

For CMS Page / Block:

```
{{block class="ZealousWeb\GTranslator\Block\Select" name="translator_block"
template="ZealousWeb_GTranslator::select.phtml"}}
```

For Layout Page / Block:

```
<block class="ZealousWeb\GTranslator\Block\Select" name="gtranslator_select"
template="ZealousWeb_GTranslator::select.phtml" />
```

NOTE: Please set **NO** to **Enable** option in **General** Tab before adding **GOOGLE TRANSLATOR** control to other block or page.
