

## How To Use

---

You have to configure it from wp-admin > Contact > Add/Edit Contact Forms (Contact Form 7 needs to be activated before) to use this plugin.

You will find a new tab “Authorize.Net” along with Form, Mail, Messages, Additional Settings from where you can make all settings related to Authorize.Net.

**Note: You need to add the “Authorize.net” tag in your form. You will find a tag “Authorize.Net” along with text, email, URL and etc.**

To add the Authorize.Net payment form to your Contact Form 7, find the setting attributes given below.

## 01 Enable Authorize.Net Payment Form

Check the Authorize.Net Payment Form for Authorize submit button activation.

## 02 Enable Test API Mode

Enable Test API Mode

## 03 Enable Debug Mode

Check the Enable Debug Mode to start transaction debugging.

## 04 Sandbox Login Id (required)

This field is required when you have set Authorize.net mode to sandbox if your site is in test mode.

Get Your Sandbox Login ID:

Get it from [Sandbox Authorize.net](#) then Account > Security Settings > API Credentials & Keys page in your Authorize.net account.

#### 05 **Sandbox Transaction Key (required)**

This field is required when you have set Authorize.net mode to sandbox if your site is in test mode.

Get Your Sandbox Transaction Key:

Get it from [Sandbox Authorize.net](#) then Account > Security Settings > API Credentials & Keys page in your Authorize.net account. For security reasons, you cannot view your Transaction Key, but you will be able to generate a new one.

#### 06 **Live Login Id (required)**

This field is required when you have set Authorize.net mode to live if your site is in live mode.

Get Your Live Login ID:

Get it from [Authorize.net](#) then Account > Security Settings > API Credentials & Keys page in your Authorize.net account.

#### 07 **Live Transaction Key (required)**

This field is required when you have set Authorize.net mode to live if your site is in live mode.

Get Your Live Transaction Key:

Get it from [Authorize.net](#) then Account > Security Settings > API Credentials & Keys page in your Authorize.net account. For security reasons, you cannot view your Transaction Key, but you will be able to generate a new one.

#### 08 **Amount Field Name (required)**

You have to set a name attribute to any of your fields of Contact Form 7 like drop-down menu, textbox, hidden field, radio buttons, etc., from which you need to pass the amount value to the Authorize.net website.

For example, [hidden price "20"] This is a hidden field with the name "price". You will need to set "price" in this Amount Field Name of Authorize tab.

#### 09 **Quantity Field Name (optional)**

You have to set a name attribute to any of your field of Contact Form 7 like drop-down menu, textbox, hidden field, radio buttons, etc. from which you need to pass the quantity of the item to the Authorize.net website.

For example, [radio quantity "1" "2" "3"] This is a radio button field with name "quantity". You will need to set "quantity" in this Quantity Field Name of Authorize.net tab.

## 10 Customer Email Field Name (optional)

You have to set a name attribute to the text field of contact form 7, from which you need to pass the customer's custom email to the Authorize.net website.

## 11 Description Field Name (optional)

You have to set a name attribute to the text field of Contact Form 7 from which you need to pass the description of the item to the Authorize.net website.

## 12 Select Currency

You can select your currency of Authorize here, and there are 25 currencies supported in this plugin. Default is set as AUD (Australian Dollar).

## 13 Success Return URL (optional)

You can enter the URL of the page to redirect for a Successful Authorize Payment transaction.

## 14 Cancel Return URL (optional)

You can enter the URL of the page to redirect if a transaction fails.

## 15 Customer Details

### 15.1 First Name

You have to set a name attribute to the text field of contact form 7, from which you need to pass the First Name of the customer to the Authorize.net website.

### 15.2 Last Name

You have to set a name attribute to the text field of contact form 7, from which you need to pass the Last Name of the customer to the Authorize.net website.

### 15.3 Company Name

You have to set a name attribute to the text field of contact form 7, from which you need to pass the Company Name of the customer to the Authorize.net website.

### 15.4 Address

You have to set a name attribute to the text field of contact form 7, from which you need to pass the Address of the customer to the Authorize.net website.

### 15.5 City

You have to set a name attribute to the text field of contact form 7, from which you need to pass the City of the customer to the Authorize.net website.

15.6

### State

You have to set a name attribute to the text field of contact form 7, from which you need to pass the State of the customer to the Authorize.net website.

15.7

### Zip Code

You have to set a name attribute to the text field of contact form 7, from which you need to pass the Zip Code of the customer to the Authorize.net website.

15.8

### Country

You have to set a name attribute to the text field of contact form 7, from which you need to pass the Country of the customer to the Authorize.net website.

State

You need to add the “Authorize.Net Recurring” tag to your form. You will find a tag “Authorize.Net Recurring”

Copy this shortcode and paste it into your post, page, or text widget content:  
`[contact-form-7 id="5" title="Authorize"]`

Form Mail Messages Additional Settings Authorize.Net

Form

You can edit the form template here. For details, see [Editing form templates](#).

text email URL tel Authorize.Net Authorize.Net Recurring number date text area drop-down menu checkboxes radio buttons acceptance quiz file submit

```
<label> Your First name
[text firstname] </label>

<label> Your Last name
[text lastname] </label>

<label> Your email
[email* email] </label>

<label> Price
[text* price] </label>

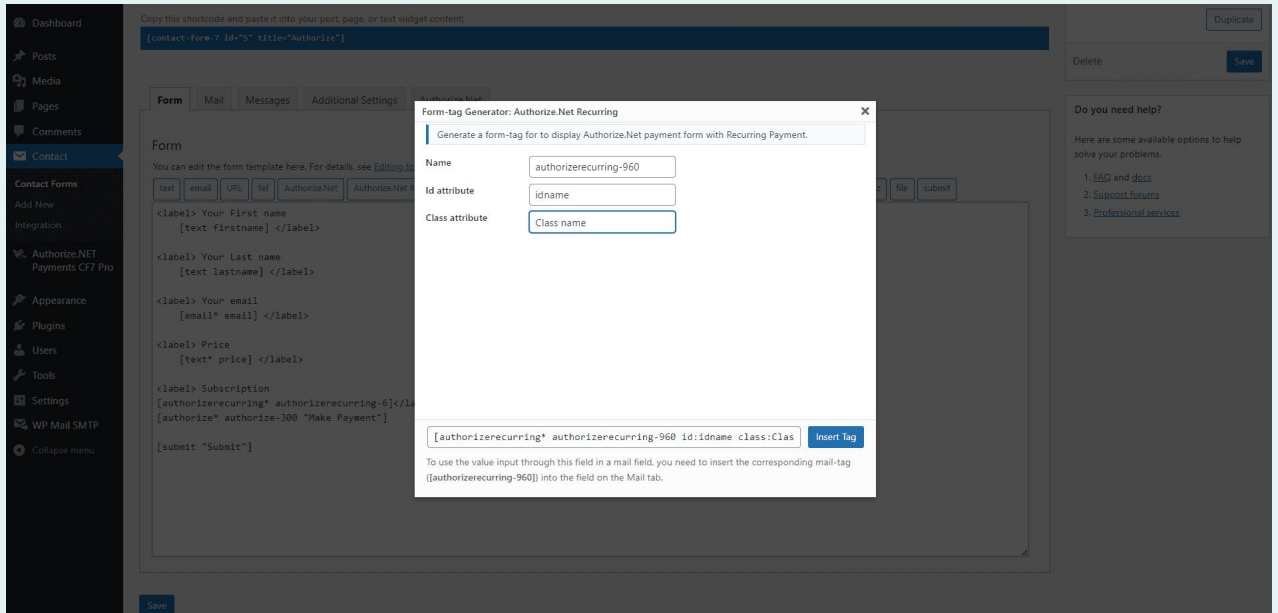

<label> Subscription
[authorize recurring* authorize recurring-6] </label>
[authorize* authorize-300 "Make Payment"]

[submit "Submit"]
```

3. [Professional services](#)

You can modify the tag generator code to add the ID attribute and class attribute to your Contact Form 7 form using the “Authorize.Net Recurring” tag. Here’s an Example:

The front side shows the plan dropdown and the amount of recurring.

Admin side list has an option for canceling the subscription.

The screenshot shows the WordPress admin dashboard with the 'Authorize.NET Payments CF7 Pro' menu item highlighted. The main content area displays the following information:

Invoice ID	cf7adn/1739334009	
Amount	363	
Total	363	
Request IP	192.168.1.1	
Currency code	AUD	
Form data	firstname	Constance
	lastname	Kidd
	email	nemiby@mailinator.com
	price	363
	recurring-plan-cf7adn	Weekly
	authorizerecurring-6	
	your-message	-
Transaction status	Approved	
Recurring ID	8848571	
Cancel Recurring	<input type="button" value="Cancel Recurring"/>	

At the bottom of the page, there is a footer that reads "Thank you for creating with WordPress" and "Version 6.2.2".
