

# How To Use

You have to configure it from wp-admin > CF7 User Registration > Settings (Contact Form 7 needs to be activated first) to use this plugin.

The screenshot shows the 'User Registration CF7 Settings' page. The left sidebar contains a navigation menu with 'CF7 User Registration' selected. The main content area is titled 'User Registration CF7 Settings' and is divided into two sections: 'Registration Form Settings' and 'Registration Form Field Mapping'. The 'Registration Form Settings' section includes the following options:

- Select Registration Form: Registration Form (dropdown)
- Enable Registration Form:  (Warning: Registration process will not work unless you tick this box. However, you can ignore this warning if you want to disable registration process.)
- Enable Debug Mode:
- Enable Auto Login After User Registration:
- Skip Contact Form 7 Email:
- Enable Password Field:
- User Approval Option:  (This will only apply if auto login is disabled.)
- Select User Role Field: Editor (dropdown)
- Select Success URL: Select Page (dropdown)

The 'Registration Form Field Mapping' section includes the following option:

- Select Email Field: [your-email] (dropdown)

## 01 Select Registration Form

Select the form for User Registration.

## 02 Enable Registration Form

This feature is used for enabling registration forms temporarily.

## 03 Enable Debug Mode

Tick the checkbox to enable the debug mode to generate user logs.

## 04 Enable Auto Login After User Registration

If this checkbox is checked, the user will auto login to the website after registration.

## 05 Skip Contact Form 7 Email

Tick the checkbox to skip the default contact form 7 email.

## 06 Enable Password Field

If this checkbox is checked, the user can enter the password in the password field. You will have to select the password field from the dropdown.

## 07 User Approval Option

Admin can choose whether the registered user can directly access the login page or after admin approval.

## 08 Select User Role Field

Select the user role for user registration.

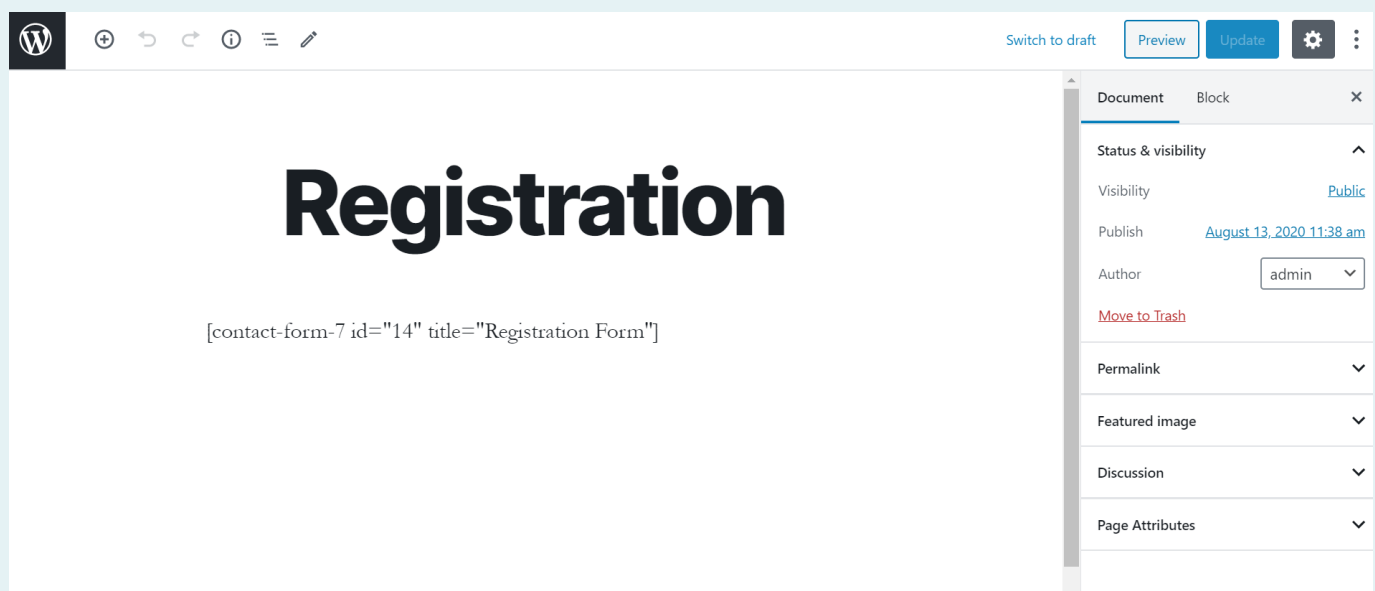

## 09 Select Success URL

Select the page, where the user will be redirected after successful registration.

Once you select all the fields for the Registration and Login form. You can add the Contact Form 7 Form shortcode to the page.

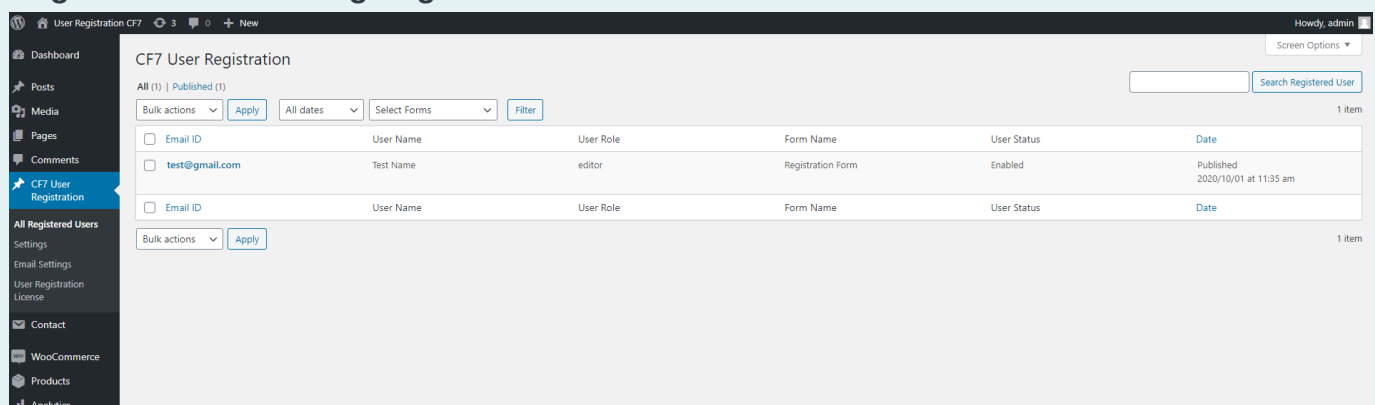

### Add the Form Shortcode on page:

Once the settings are saved, add the form's shortcode to the desired page. The form should be the same that you have selected for the registration process. You can carry out the same process with the login form also.

The screenshot shows a WordPress page editor interface. The main content area displays the word "Registration" in a large, bold, black font. Below it, the Contact Form 7 shortcode is visible: `[contact-form-7 id="14" title="Registration Form"]`. The right sidebar shows the "Document" settings panel, including "Status & visibility" (Public), "Publish" date (August 13, 2020 11:38 am), and "Author" (admin). The top navigation bar includes "Switch to draft", "Preview", "Update", and a settings gear icon.

### Registered User Listing Page:

The screenshot shows the WordPress admin dashboard. The left sidebar contains navigation menus for "Dashboard", "Posts", "Media", "Pages", "Comments", "CF7 User Registration", "All Registered Users", "Settings", "Email Settings", "User Registration License", "Contact", "WooCommerce", "Products", and "Analytics". The main content area displays the "CF7 User Registration" listing page. It shows a table with columns for "Email ID", "User Name", "User Role", "Form Name", "User Status", and "Date". A search bar and "Search Registered User" button are visible. The table contains one entry: a user with email "test@gmail.com", name "Test Name", role "editor", and form "Registration Form".

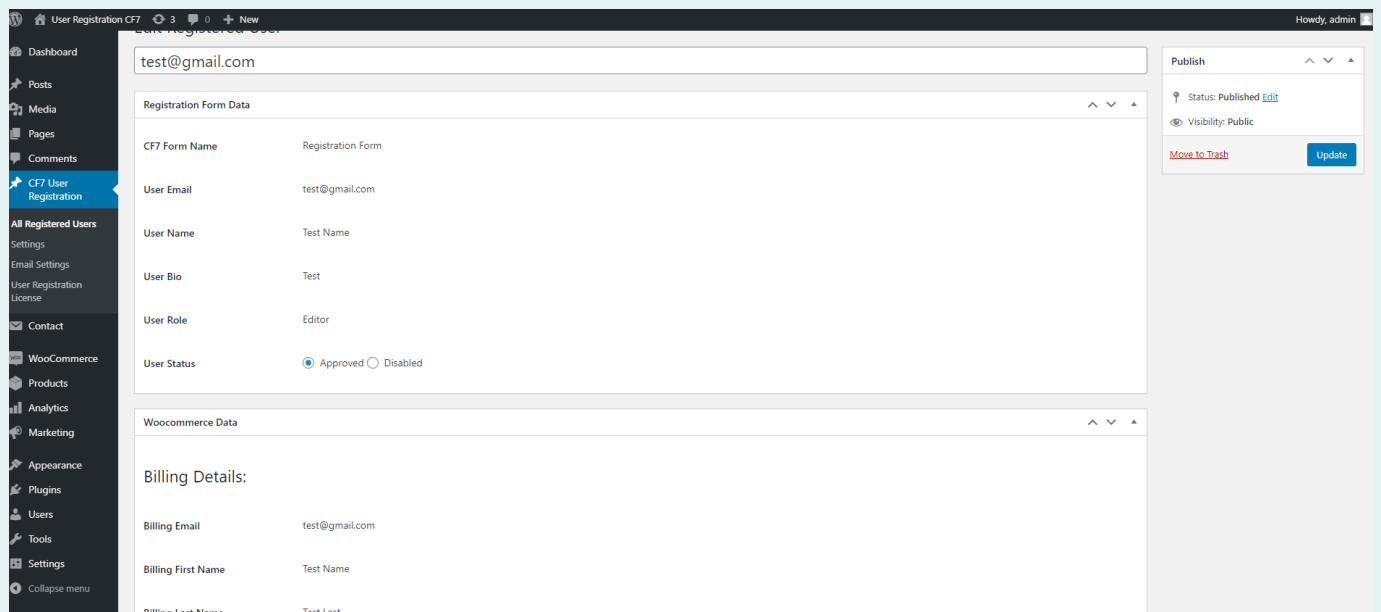

Email ID	User Name	User Role	Form Name	User Status	Date	
<input type="checkbox"/>	test@gmail.com	Test Name	editor	Registration Form	Enabled	Published 2020/10/01 at 11:35 am

This page will show all the users who have been registered using the Contact Form 7 form. You can view the CF7 user's email, username, and user role, etc.

## Registered User Detail Page:

Admin can view the registration details of a particular user here. You can also disable the user from the admin by selecting the User Status option.

The screenshot shows the WordPress admin dashboard with the 'User Registration' plugin interface. The main content area displays the registration details for a user with the email 'test@gmail.com'. The details are organized into two sections: 'Registration Form Data' and 'Woocommerce Data'.

Registration Form Data	
CF7 Form Name	Registration Form
User Email	test@gmail.com
User Name	Test Name
User Bio	Test
User Role	Editor
User Status	<input checked="" type="radio"/> Approved <input type="radio"/> Disabled

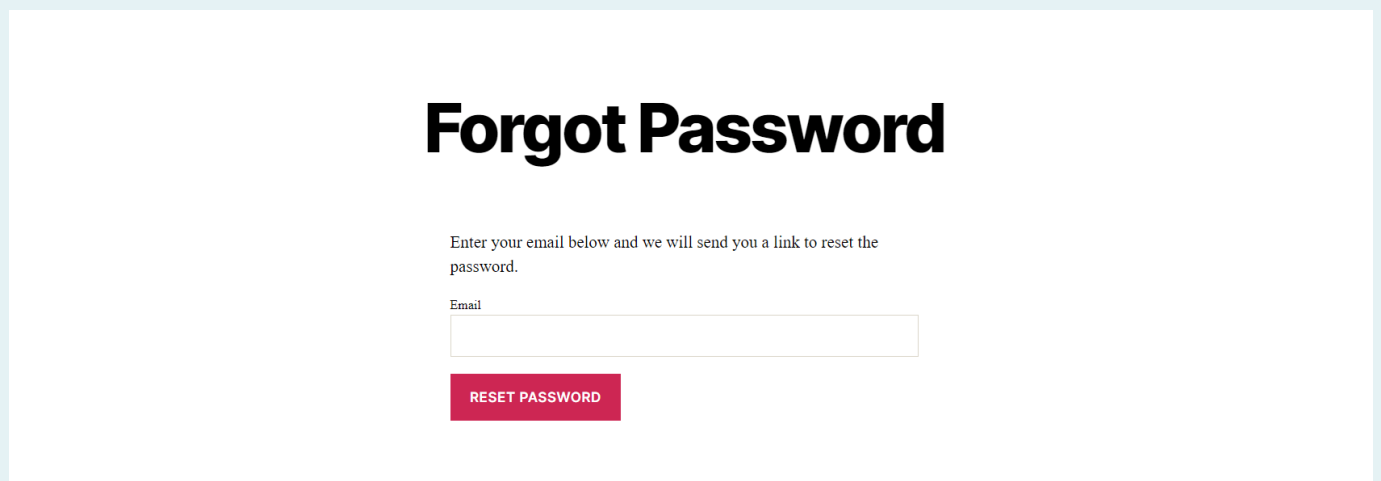

Woocommerce Data	
Billing Details:	
Billing Email	test@gmail.com
Billing First Name	Test Name
Billing Last Name	Test Last

On the right side, there is a 'Publish' section with options for 'Status: Published' and 'Visibility: Public', along with 'Move to Trash' and 'Update' buttons. The left sidebar shows the navigation menu with 'CF7 User Registration' highlighted.

## Forgot Password:

This plugin also provides Forgot Password and Reset Password option along with Registration and Login. You can use the below shortcode for Forgot Password:

**[zurcf7\_forget\_password]**

The screenshot shows a 'Forgot Password' form with a large heading and a text input field. Below the input field is a red 'RESET PASSWORD' button.

# Forgot Password

Enter your email below and we will send you a link to reset the password.

Email

**RESET PASSWORD**

## Reset Password:

You can use the below shortcode for Forgot Password:

**[zurcf7\_reset\_password\_custom\_form]**

# Reset Password

New password

Repeat new password

Hint: The password should be at least twelve characters long. To make it stronger, use upper and lower case letters, numbers, and symbols like ! " ? \$ % ^ & ).

RESET PASSWORD
